

Which factors actually matters in student exam performance?

DATASET

Kaggle · StudentPerformanceFactors

DATE

Mai 2026

StudentPerformanceFactors.

01 / LEARNING HABITS

What you do.

Attendance × Exam_Score

= SCATTERPLOT

02 / SOCIAL & FAMILY

What you bring.

Family_Income × Exam_Score

= BAR CHART

03 / PERSONAL DRIVERS

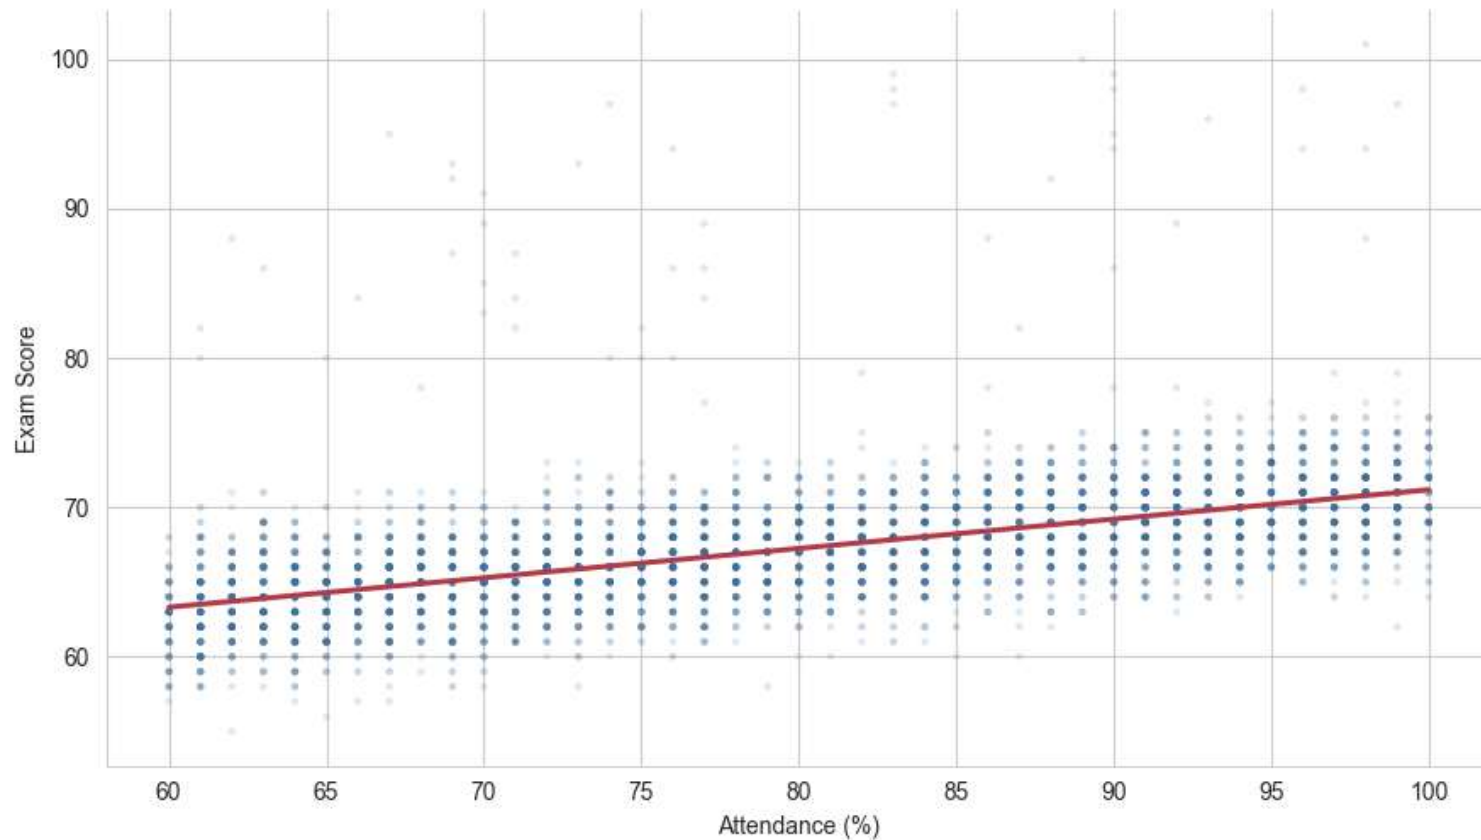

What's inside.

Motivation_Level × Exam_Score

= BOXPLOT

01 / LEARNING HABITS

Higher Attendance Is Strongly Linked to Higher Exam Scores

01 / ATTENDANCE

VARIABLE

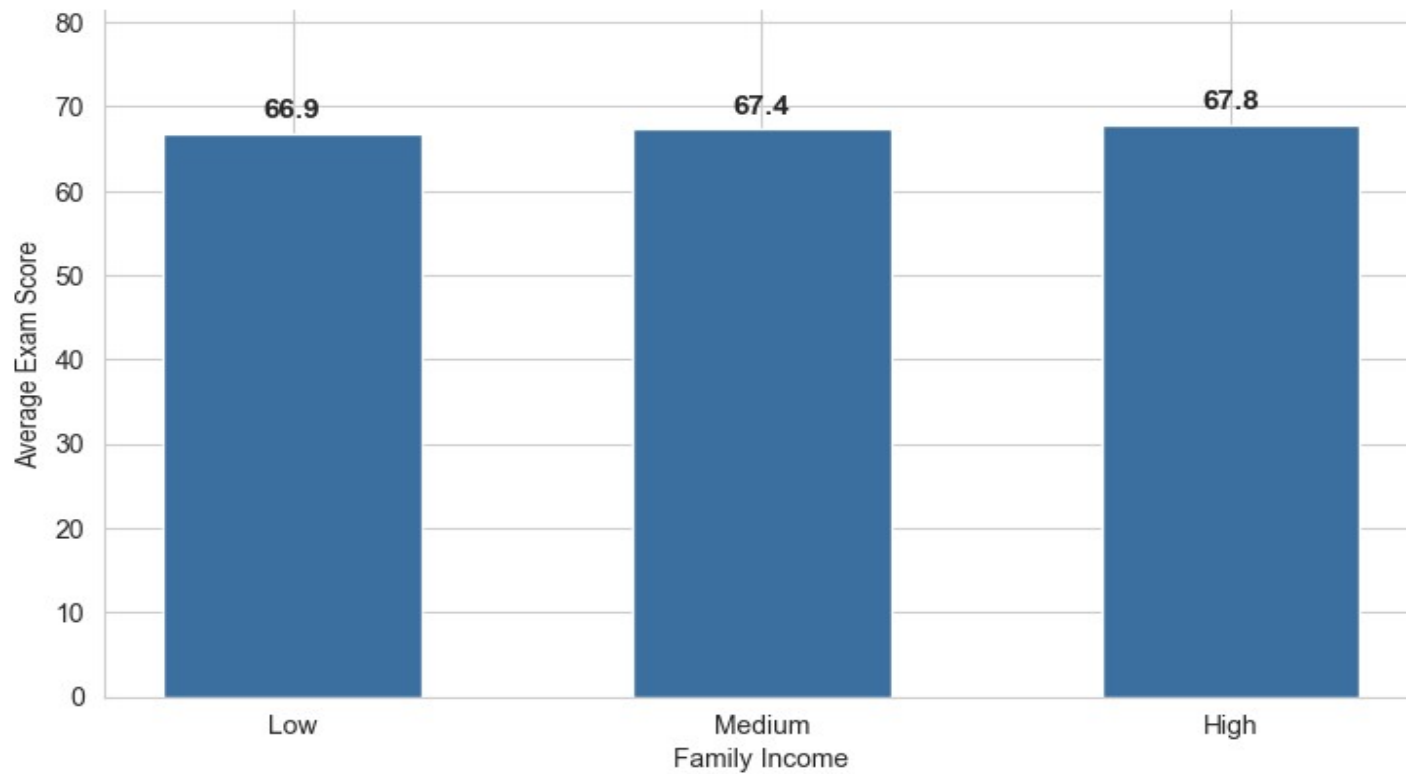

Attendance × Exam_Score

CHART

Quant × Quant → scatter.

02 / SOCIAL & FAMILY

Family Income Has Only a Small Effect on Exam Score

02 / FAMILY INCOME

VARIABLE

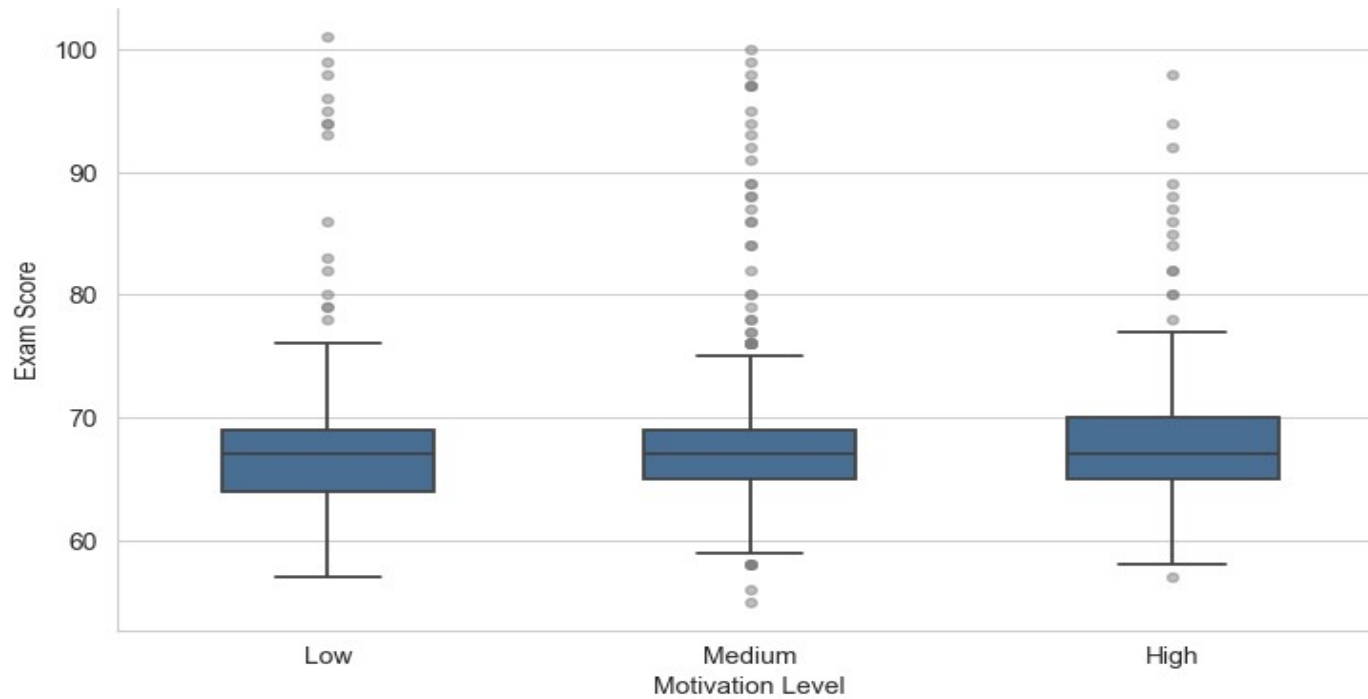

Family_Income × Exam_Score

CHART

Cat × Quant → bar.

03 / PERSONAL DRIVERS

Motivation Level Shows Only a Small Effect on Exam Score

How to read: box = middle 50% of scores | line in box = median | whiskers = typical range | dots = outliers.

03 / MOTIVATION

VARIABLE

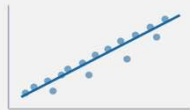

Motivation_Level × Exam_Score

CHART

Means close → show distribution.

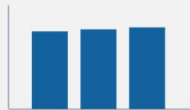

WHAT THE CHARTS REVEAL

Three charts, three lessons.

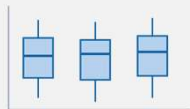

01 · SCATTERPLOT · ATTENDANCE

A clear upward trend, students who show up consistently score consistently higher.

02 · BAR CHART · FAMILY INCOME

Three bars at nearly the same height, income shifts the average, but barely.

03 · BOXPLOT · MOTIVATION

Boxes overlap heavily, the spread within a group is bigger than the gap between groups.

“What you do in class outweighs what you bring with you, and what’s in your head”

“The strongest lever is also the simplest.”
